

EAST SPRUCE DESIGN BUILD

Website Redesign — Homepage

Product Requirements Document v2.0

Modeled on the Adventure Wagon Homepage Structure

February 2026

Project	East Spruce Design Build — Homepage Redesign
Version	2.0 (Homepage-Focused, AW-Inspired Structure)
Date	February 2026
Owner	Elliot Nolter, East Spruce Design Build (ESDB)
Prepared by	Joseph Pascucci, Three Rings Enterprises (3RE)
Reference site	adventurewagon.com (homepage structure and flow)
Status	Draft — Awaiting Designer Review

1. Purpose of This Document

This PRD specifies the East Spruce Design Build homepage redesign using the Adventure Wagon (AW) homepage as the structural and experiential reference model. It documents, section by section, how each element of the AW homepage translates to an equivalent element for ESDB's services and brand.

The goal is not to copy Adventure Wagon's aesthetic or content — it is to borrow their homepage architecture: the rhythm of the page, the way they walk a visitor from brand statement → process → credibility → portfolio → shop → CTA. East Spruce will apply that same proven logic to its own services, voice, and photography.

ADVENTURE WAGON	EAST SPRUCE DESIGN BUILD
Modular van conversion kits & gear for Sprinter/Transit vans Products: DIY kits, factory installs, gear shop Audience: adventure-oriented van lifers, travelers CTA: Configure and buy a kit online	Architecture, design/build, sustainability consulting Services: paid consult, architecture, design/build, sustainability Audience: homeowners, developers in Lehigh Valley / PA-NJ CTA: Book a consultation or start a project
Key structural insight: AW walks the visitor through a clear 4-step journey from discovery → configure → install → enjoy. Every section of the homepage maps to one of those stages.	ESDB will use the same principle: walk the visitor from brand impression → service understanding → process → proof → shop (future) → CTA. Each section removes a reason not to reach out.

2. Adventure Wagon Homepage — Section-by-Section Map

The following table documents each section of the AW homepage in sequence, as observed on adventurewagon.com. This serves as the structural template ESDB will adapt from.

#	Section Name	AW Content / Format	Structural Purpose
1	Announcement Bar	Promo strip: "\$1000 off install, booked by Feb 20"	Creates urgency; rewards action
2	Utility Nav	Top-level quick-links: Van Conversion, Gear Shop, Account, Cart	Ecommerce wayfinding; separates audience paths
3	Main Navigation	Logo + About Us / Build Your Van / Installation / Community / Gear Shop / Contact	Primary site navigation; organizes by task
4	Hero — Full Viewport	Bold headline: 'VAN LIFE FOR REAL LIFE' / subhead + CTA button 'START YOUR BUILD'	Immediate value prop; single action to take
5	Social Proof Bar	Dark strip: 'JOIN 2,026+ OTHERS WHO LOVE THEIR ADVENTURE WAGON'	Volume/trust signal; reduces hesitation
6	Brand Statement	Navy bg: 'THE ORIGINAL MODULAR VAN CONVERSION KIT' + 2-sentence brand explanation	Clarifies exactly what they sell; educates
7	4-Step Process Grid	Step 1–4 image cards with embedded CTAs: Find Van / Design Kit / Select Install / Hit Road	Maps the journey; each step links deeper
8	Video Embed	Centered video: 'NEVER OUTGROW YOUR VAN LAYOUT' on lifestyle bg	Shows product in use; emotional engagement
9	Why Choose Us Accordion	Navy bg, 6 expandable reasons: Modular / One Stop Shop / Install Options / Quality / Support / Adventure Ready	Handles objections; reinforces value
10	Portfolio Carousel	'EVERY VAN TELLS A STORY' + scrolling gallery of community builds	Social proof via real projects; aspiration
11	Shop Section	Forest-green bg: 'THE GEAR SHOP' + 4 category cards: Storage / Sleeping / Exterior / Off-Grid	Revenue section; drives ecommerce discovery
12	Lifestyle CTA Section	Full-bleed image of couple camping + 'STEP BY STEP' headline + 'GET IN TOUCH'	Emotional close; final conversion push
13	Footer	Multi-column: nav links + email newsletter signup 'JOIN THE JOURNEY'	Navigation + list growth

3. East Spruce Homepage — Section-by-Section Specifications

This section defines each homepage section for ESDB in the same sequence as the AW homepage. Each entry includes the AW comparison, the ESDB equivalent content spec, design direction, and any copy notes or open decisions.

Section 1: Announcement Bar

AW equivalent: Promo strip

AW: Promo Strip	ESDB: Seasonal / Limited Offer Strip
Orange top bar: '\$1000 OFF Your Install If Booked By Feb 20th' — creates urgency and rewards decisiveness.	Thin colored bar above the nav. Use for time-sensitive messages: limited consultation slots, a new service launch, a seasonal offer, or a blog post announcement.
📌 Design Note: At launch, this can be used to promote the introductory consultation offer. Example: 'Now booking Spring 2026 consultations — reserve your spot today →'. If no active offer exists, hide the bar rather than leave it blank.	

CONTENT REQUIREMENTS

- Text: Short, action-oriented, max 90 characters
- Optional: inline CTA link within the strip text
- Color: ESDB teal background with white text (brand-aligned, warmer than AW orange)
- Dismissible or persistent — designer to recommend
- Mobile: same bar, wraps to 2 lines if needed

Section 2: Navigation

AW equivalent: Utility nav + main nav

AW: Dual Navigation	ESDB: Single Navigation Bar
AW has two nav bars: a utility strip (ecommerce/account links) and a main branded nav. Separation reflects the complexity of their product ecosystem.	ESDB does not need a utility nav at launch. Use a single sticky header: Logo (left) + nav links (right): Portfolio • Services • About • Start a Project (button).
📌 Design Note: When the shop launches (Phase 3), a utility bar or a 'Shop' nav item can be added without rebuilding the navigation structure. Design the header with this in mind — leave room for one additional nav item.	

HEADER SPECS

- Logo: left-aligned, links to homepage
- Nav links: Portfolio | Services | About | Start a Project
- 'Start a Project' styled as a filled teal pill/button — visually distinct from text links
- Sticky on scroll (fixed position)
- Background: white or very light with subtle shadow on scroll
- Mobile: hamburger icon → full-screen overlay or slide-in drawer
- Future placeholder: 'Shop' nav item (hidden/disabled at launch, activates in Phase 3)

Section 3: Hero

AW equivalent: Full-viewport hero with bold headline + single CTA

■ AW: Hero — Full Viewport	■ ESDB: Hero — Full Viewport
<i>Full-bleed photo of a van in snow. Massive bold all-caps headline: 'VAN LIFE FOR REAL LIFE'. Subhead: 'Modular Interior Systems for Sprinter & Transit Vans'. Single CTA button: 'START YOUR BUILD →'</i>	Full-bleed project photography (interior or aerial drone shot of a completed project). Bold headline communicates what ESDB does AND who it's for. Single primary CTA.
✂ Design Note: AW's headline is aspirational ('Van Life for Real Life'). ESDB's should be grounded and specific. Avoid abstract taglines like 'Resourceful. Responsible. Design.' in the hero — save those for the brand statement section below.	

HEADLINE DIRECTION

- Two Line Punch integrating an animation.
- Line one = static text: 'Design For'
- Line two is a text carousel cycling through e.g.: 'Real Life', 'Family Life', 'Real Memories', 'Simple Living', etc. — emotive, durable
- Final text to be decided by Elliot + Joe before design

SUBHEAD

- One sentence. Who ESDB is and what they do:
- Option A: 'East Spruce is a licensed architecture and design/build studio serving homeowners and property owners across Pennsylvania and New Jersey.'
- Option B 'Your trusted design partner for sustainable architecture in the Tri-State Area'

CTA

- Primary: 'Start a Project →' or 'Schedule a Consultation →' — links to /contact or /ask-the-expert
- Secondary (optional, text link below button): 'See Our Work →' links to /portfolio

PHOTOGRAPHY DIRECTION

- Placeholder okay
- Full-viewport, high-resolution project photo — interior or aerial
- Should feel designed and intentional, not stock
- Sufficient contrast for white text overlay (dark image or gradient overlay)

Section 4: Social Proof Bar

AW equivalent: 'JOIN 2,026+ OTHERS WHO LOVE THEIR ADVENTURE WAGON'

AW: Social Proof Strip

Single-line dark strip below the hero: 'JOIN 2,026+ OTHERS WHO LOVE THEIR ADVENTURE WAGON'. Volume creates trust instantly — if 2,000+ people bought, it must be real.

ESDB: Trust / Proof Strip

A single-line strip anchoring below the hero that signals ESDB's credibility and reach. Use whatever proof signal is strongest at launch.

✂ Design Note: If ESDB has a strong Houzz rating or Google review count, lead with that. If not, use a meaningful project or client milestone. This section should never be empty or generic — pick the single most impressive number or signal available.

CONTENT OPTIONS (CHOOSE THE STRONGEST AVAILABLE)

- Google/Houzz reviews: '4.9 stars across 38 Google reviews' + star icons
- Project volume: '70+ projects completed across PA & NJ'
- Experience: 'Serving the Lehigh Valley since 2018 — Licensed in PA & NJ'
- Certification highlight: 'Certified Passive House Consultant (CPHC) • LEED-aligned design'

DESIGN NOTES

- Dark teal or near-black background, white text
- Optionally: 3 small stats side-by-side (e.g., '70+ projects | 6+ years | PA & NJ licensed')
- Keep it to one line or a very short strip — not a full section

Section 5: Brand Statement

AW equivalent: 'THE ORIGINAL MODULAR VAN CONVERSION KIT' on dark background

AW: Brand Statement

Navy background, centered headline: 'THE ORIGINAL MODULAR VAN CONVERSION KIT'. 2-3 sentences explaining what makes AW different: the modular system, flexibility, reconfigurability.

ESDB: Brand / Philosophy Statement

Dark background section that says clearly: here's what ESDB is, here's the philosophy behind it, and here's why it matters. This is where 'Resourceful. Responsible. Design.' lives — with context and meaning, not as a standalone tagline.

✂ Design Note: AW uses this section to explain their unique mechanism (modularity). ESDB should use it to explain their integrated model and sustainability-as-default philosophy. The tone here can be bolder and more editorial than the rest of the page.

SUGGESTED HEADLINE

- 'Resourceful. Responsible. Design.' — with further context below it
- Or: 'The Only Studio That Designs It, Builds It, and Stands Behind It.'
- Or: 'Where Architecture Meets Craft. And Craft Meets Accountability.'

BODY COPY (2–3 SENTENCES)

- Should explain the design/build model in plain language
- Should mention sustainability as a core operating principle (not an add-on)

- Should communicate single-point accountability as a client benefit
- Example: 'Most projects fail where design meets construction. East Spruce closes that gap by leading both — from the first sketch to the final nail. Sustainability isn't a green label we apply at the end. It's how we think from day one.'

DESIGN NOTES

- Dark background (near-black or deep teal) — strong visual break from the white hero above
- Centered copy, generous padding, large type
- No CTA needed here — this section builds belief, not clicks

Section 6: How We Work — Step-by-Step Process

AW equivalent: 4-step grid (Find Van / Design Kit / Select Install / Hit Road)

This is the most important structural borrowing from Adventure Wagon. AW's 4-step grid does something most websites fail to do: it gives the visitor a clear, visual map of the entire journey before they commit to anything. It removes the fear of the unknown. ESDB should do exactly the same thing for the design/build process.

AW: 4-Step Journey Grid	ESDB: 5-Step Design/Build Journey
Step 1: Find Your Van → Step 2: Design Your Kit → Step 3: Select Install → Step 4: Hit the Road. Each step is a large image card with its own embedded CTA button.	Step 1: Book a Consultation → Step 2: Proposal & Design → Step 3: Documents & Permits → Step 4: Build → Step 5: Move In. Each step is an image card linking deeper into the services page.
📌 Design Note: AW uses 4 steps; ESDB may need 4 or 5 depending on final process definition. Each step must have its own photo (a project photo or process photo) and a CTA that moves the visitor toward a relevant next page. Steps should feel like an invitation, not a liability list.	

STEP-BY-STEP CONTENT SPEC

STEP ONE Book a Consultation	STEP TWO ??Design Your Space??	STEP THREE ??We Build It??	STEP FOUR Live Better
AW: Find Your Van CTA: "Schedule Now →" links to /ask-the-expert	AW: Design Your Kit CTA: "See Our Work →" links to /portfolio	AW: Select Install CTA: "Our Process →" links to / services	AW: Hit the Road CTA: "Start a Project →" links to /contact

PHOTOGRAPHY FOR EACH STEP

- Step 1 (Consultation): Photo of Elliot with a client at a site or in the studio
- Step 2 (Design): Architectural drawing, rendering, or design sketch
- Step 3 (Build): Construction photo — framing, materials, hands at work
- Step 4 (Live Better): Completed, beautiful interior or exterior shot

DESIGN NOTES

- Layout: 4-column image grid on desktop, 2x2 on tablet, stacked on mobile
- Each card: project photo + step label + bold step name + CTA button

- Dark overlay on each image for text legibility
- Background of the overall section: dark navy or deep teal for visual drama

Section 7: Video or Project Showcase

AW equivalent: 'NEVER OUTGROW YOUR VAN LAYOUT' embedded video

AW: Centered Video Embed

Lifestyle background image with a centered, bordered video player. Headline overlay: 'NEVER OUTGROW YOUR VAN LAYOUT'. Shows the product working in real life.

ESDB: Video or Before/After Showcase

A cinematic moment that makes the work feel real and human. If a project walkthrough video exists, use it. If not, a before/after photo comparison or a single full-bleed project photo with a pull-quote overlay is a strong alternative.

✂ Design Note: A 60–90 second project walkthrough or time-lapse video would be ideal here and would match AW's approach closely. Even a drone walkthrough of a completed project edited to music would work. If video is not available at launch, a large-format before/after comparison is a credible stand-in.

OPTION A — VIDEO (PREFERRED)

- Duration: 60–90 seconds
- Content: project walkthrough, renovation transformation, or Elliot talking about the philosophy
- Format: hosted on Vimeo or YouTube, embedded without branding/suggested videos
- Overlay headline: 'Every Project Starts With a Conversation.' or 'See the Process in Action.'

OPTION B — BEFORE / AFTER (IF NO VIDEO AT LAUNCH)

- Side-by-side slider or split photo: before renovation vs. after
- Caption: project name, location, service type
- Headline: 'What a Difference a Design Makes.'

OPTION C — PULL QUOTE ON FULL-BLEED IMAGE

- Large project photo with a client testimonial overlaid
- Name, project type, and short quote

Section 8: Why Choose ESDB

AW equivalent: 'WHY SO MANY ARE CHOOSING ADVENTURE WAGON' accordion

AW: Expandable Reasons Accordion

Navy background. 6 expandable panels: More Than Modular / One Stop Shop / Flexible Install Options / Quality + Durability / Customer Service + Support / Adventure Ready. Each expands to reveal a short explanation.

ESDB: Why ESDB — Differentiators Panel

A dark-background section with 4–6 ESDB differentiators. Can be accordion/expandable (like AW, preferred) or a static grid of icon + headline + 2-sentence description. Each reason directly handles a prospect objection or worry and has a CTA to the funnel.

✂ Design Note: AW's accordion format keeps the section compact while rewarding engaged visitors. For ESDB, either an accordion or a 2-column grid of cards works. The key is that the reasons map to actual objections a homeowner has before hiring a design/build firm.

ESDB DIFFERENTIATORS — RECOMMENDED 6 REASONS

Differentiator	Explanation (headline + 2 sentences)
Designer-Led From Day One	Unlike general contractors, we bring design thinking before a single wall goes up. Siting, light, proportion, and sustainability are decisions made at the start — not afterthoughts. CTA: “Learn More →” links to /video or /project-planning-pack
One Studio. Full Accountability.	You have one phone number and one team responsible for design and construction. No finger-pointing between your architect and your builder. CTA:??
Sustainability Is the Default	We don’t offer a ‘green option.’ Every project starts with high-performance building science baked in. Lower energy bills and a smaller footprint aren’t extras — they’re the baseline. CTA:??
Licensed Architects, Certified Builders	Elliot Nolter is a licensed architect in PA and NJ, a Certified Passive House Consultant, and a Sustainable Homes Professional. Our credentials are specific and verifiable. CTA: “Book a Call →” links to /ask-the-expert
We Qualify the Fit First	We’ll tell you honestly if we’re the right team for your project. The paid consultation is designed to give you real value whether we work together or not. CTA:??
Craft That Lasts a Century	Our goal isn’t to build what you want right now. It’s to build what you’ll still love in 100 years. That requires different decisions at every stage. CTA: “See Our Work →” links to /portfolio

Section 9: Portfolio — Project Gallery

AW equivalent: 'EVERY VAN TELLS A STORY' scrolling gallery

AW: Community Gallery Carousel	ESDB: Featured Projects Gallery
'EVERY VAN TELLS A STORY' — scrolling carousel of customer build photos. Social proof via real-world use. Button: 'SEE WHAT'S POSSIBLE →'	'Every Project Starts With a Vision' — curated carousel or grid of 3–4 featured portfolio projects. Each card shows project name, type, and a compelling photo. Button: 'See All Work →' links to /portfolio.
✂ Design Note: AW's gallery shows community builds (user-generated), reinforcing volume. ESDB's should show curated studio work, reinforcing quality. Choose the 3–4 most visually striking and diverse projects — one residential renovation, one new build, one sustainability-forward project, and one outdoor/special project.	

SECTION HEADLINE

- 'Every Project Tells a Story.' or 'Our Work Speaks Louder Than Our Resume.'

CARD SPECS (3–4 CARDS)

- Large project photo (landscape orientation preferred)
- Project name (e.g., 'Bethlehem Net-Zero Renovation')
- Project type tag (e.g., 'Residential Addition | Passive House')
- On hover: slight overlay with 'View Project →' link

SECTION CTA

- Button below gallery: 'See All Projects →' — links to /portfolio

DESIGN NOTES

- Layout: horizontal scroll carousel on mobile; 3-column grid or featured-left layout on desktop
- Dark or neutral background to make photography pop

Section 10: Shop / Digital Products (Future Placeholder – not required for Redesign Phase 1)

AW equivalent: 'THE GEAR SHOP' category grid

AW: Gear Shop Category Grid	ESDB: ESDB Shop — Phase 3 Placeholder
Forest-green background. Headline: 'THE GEAR SHOP'. 4 photo category cards: Storage / Sleeping / Exterior / Off-Grid. Each: 'SHOP NOW →'. Drives ecommerce discovery.	This section will house ESDB's digital products, plan sets, guides, and physical goods when the shop launches. At launch, the section is designed but shows a 'Coming Soon' state with a brief teaser and email waitlist capture.
📌 Design Note: This is the most significant structural difference between AW (product company) and ESDB (service company). AW's shop is a revenue center. For ESDB, Phase 1 has no shop, but the homepage should reserve this space so Phase 3 doesn't require a full redesign.	

PHASE 1 — OUT OF SCOPE OR A PLACEHOLDER STATE

- Section still exists in the homepage layout at launch
- Headline: 'Resources & Plan Sets — Coming Soon'
- Subhead: 'We're developing a library of plan sets, guides, and tools for homeowners and design professionals.'
- Email capture form: 'Get early access — join the waitlist' + first name + email + submit
- Design: same category card grid as the future state, but cards show a placeholder image and 'Coming Soon' badge rather than 'Shop Now'

PHASE 3 — FULL SHOP STATE (FUTURE)

- Category cards (like AW): Plan Sets / How-To Guides / Sustainability Toolkits / Homeowner Resources
- Each card links to a product category page
- Headline: 'The ESDB Resource Shop' or 'Build Smarter. Start Here.'
- This section should be treated as a separate design component — built to swap from placeholder → live with minimal rework

DESIGN NOTES

- Use a distinct background color for this section (olive/forest green or deep charcoal) to visually differentiate it from the services sections above, signaling a shift from 'services' to 'products'
- Category card aspect ratio should be consistent with the eventual product card layout

Section 11: Global Lifestyle / Closing CTA

AW equivalent: Couple camping with van, 'STEP BY STEP' + 'GET IN TOUCH'

AW: Full-Bleed Lifestyle Emotional Close	ESDB: Full-Bleed Emotional Close
--	----------------------------------

Full-width outdoor photo of a couple relaxing by their van. Left-side text overlay: 'STEP BY STEP — Our van configurator walks you through each choice.' CTA: 'GET IN TOUCH →'. Emotional payoff of the whole homepage.

Full-width photo of a completed, beautiful, livable ESDB project — a family in their renovated kitchen, a couple in a sunlit addition, or a home exterior at golden hour. Left-side text: a short headline about the outcome, not the process. Single CTA: 'Start Your Project →' links to /contact

✂ Design Note: AW's closing image shows people enjoying the result. ESDB should do the same — not a construction site, not a blueprint, but the feeling of having made the right choice. This is the emotional close of the entire homepage journey.

HEADLINE DIRECTION

- 'Build your dream home, starting now' — inviting, low-pressure
- 'This could be yours.' — direct, aspirational
- 'Great design doesn't just look right. It feels right.' — philosophical

BODY COPY (2–3 SENTENCES)

- 'Appy now for a free feasibility call today, and find out how to incorporate high-performance and sustainable technology into your new home.'

CTA

- Single button: 'Get In Touch →' — links to /contact

PHOTOGRAPHY DIRECTION

- Full-bleed, landscape, high resolution
- Shows the outcome of the work, not the process
- Human presence preferred (people in the space)
- Lighting: natural, warm — late afternoon or morning light

Section 12: Footer

AW equivalent: Multi-column nav + 'JOIN THE JOURNEY' newsletter signup

AW: Multi-Column Footer with Email Signup

Four navigation columns (Van Conversion / Installation / Community / About) + a 'JOIN THE JOURNEY' email signup column on the right. Reinforces site structure and grows the email list.

ESDB: ESDB Footer with Newsletter Signup

Three-column footer: Column 1 = logo + tagline + social icons + address. Column 2 = navigation links. Column 3 = 'Stay in the Loop' newsletter signup (name + email + subscribe). Dark background.

✂ Design Note: AW's footer is a content hub because they have a large site with many page types. ESDB's footer can be simpler at launch. The email signup column on the right is the high-value element to mirror — it turns every page visit (including bounces) into a potential lead.

FOOTER COLUMN 1 — BRAND

- ESDB logo (white version)
- Tagline: 'Resourceful. Responsible. Design.'
- Address: Bethlehem, PA 18018
- Social icons: Instagram, Houzz

FOOTER COLUMN 2 — NAVIGATION

- Portfolio | Services | About | Contact
- Optional secondary links: Blog | Privacy Policy | © [Year]

FOOTER COLUMN 3 — NEWSLETTER (MIRRORING AW 'JOIN THE JOURNEY')

- Headline: 'Stay in the Loop' or 'Get Project Inspiration + Updates'
 - Subtext: 'Design ideas, sustainable building tips, and occasional project stories from our studio.'
 - Fields: First Name + Email + Subscribe button
 - Privacy note: 'No spam. Unsubscribe anytime.'
-

4. Full Homepage — Section Order Summary

The table below is the definitive section order for the ESDB homepage redesign, ready to hand to a designer as a wireframe brief.

#	ESDB Section	AW Parallel	Key Content / CTA
1	Announcement Bar	<i>Promo strip</i>	Seasonal CTA: booking slots, offer, launch announcement
2	Navigation Header	<i>Main nav</i>	Logo + Portfolio / Services / About / Start a Project (button) — sticky
3	Hero — Full Viewport	<i>Full-viewport hero</i>	Bold headline + subhead + 'Start a Project →' CTA
4	Social Proof Bar	<i>Social proof strip</i>	Google stars, project count, license/certifications
5	Brand Statement	<i>Brand statement block</i>	'Resourceful. Responsible. Design.' + design/build philosophy, dark bg
6	How We Work — 4 Steps	<i>4-step process grid</i>	Step 1–4 image cards: Consult → Design → Build → Live Better
7	Project Video / Showcase	<i>Video embed</i>	Project walkthrough video OR before/after OR pull quote on image
8	Why Choose ESDB	<i>Why Choose Us accordion</i>	6 differentiators on dark bg: designer-led / accountable / sustainable / etc.
9	Featured Projects Gallery	<i>Portfolio carousel</i>	3–4 project cards + 'See All Work →'
10	Shop / Resources (Placeholder)	<i>Gear Shop grid</i>	Phase 3 placeholder: 'Coming Soon' + email waitlist capture
11	Lifestyle CTA	<i>Lifestyle closing section</i>	Full-bleed project photo + headline + 'Start a Project →'
12	Footer	<i>Footer + newsletter</i>	3-column: brand nav newsletter signup

5. Open Items Before Homepage Design Can Begin

#	Item	Owner	Status
1	Final hero headline agreed (3 options provided in Section 3)	Elliot + Joe	Decision needed
2	High-resolution hero photo selected (landscape or aerial project photo)	Elliot	Photo needed
3	Step 1–4 photography: consultation, design, construction, completed project	Elliot	Photos needed
4	Strongest social proof signal identified (Google reviews, project count, certifications)	Elliot + Joe	Research needed
5	Video content decision: record walkthrough, use existing, or skip for Option B/C	Elliot	Decision needed
6	3–4 featured portfolio projects selected with photos and brief descriptions	Elliot	Content needed
7	Brand statement / philosophy copy finalized (2–3 sentences)	Joe + Elliot	Draft in this doc
8	Email platform selected for newsletter/waitlist capture (Mailchimp, Kit, HubSpot, etc.)	Elliot + Joe	Open
9	Shop placeholder copy: product categories to tease for Phase 3	Elliot + Joe	Phase 3 planning
10	Lifestyle closing photo: completed project with human presence	Elliot	Photo needed

This PRD covers the homepage only. For full site specifications (About, Services, Portfolio, Blog, Contact), refer to the East Spruce Website PRD v1.0.
